

HUBBLE[®] FOR JD EDWARDS

TACKLE YOUR TOUGHEST JD EDWARDS REPORTING CHALLENGES

Hubble provides fast, flexible, and user-friendly reporting, visual analysis, and planning for any version of JD Edwards (JDE) World or EnterpriseOne (E1). Enjoy a short time to value with rapid installation and pre-built report templates that cover both common reporting needs and some of the toughest JDE reporting challenges. With flexible drill-down built into every report and dashboard, users can quickly find and fix reconciliation and data integrity issues.

FAST, FLEXIBLE, REAL-TIME REPORTING FOR ANY JDE MODULE

If you are frustrated with legacy reporting or BI solutions that are slow, expensive to change, IT-centric, and inflexible, Hubble is built for end users like you. There is no need to rely on IT when you're building reports and dashboards. Hubble integrates with JDE security out of the box, enables you to break free from restrictive and cumbersome legacy reporting solutions, and combines data from any module without requiring expensive JDE customizations or heavy IT involvement to create the reporting views you need.

> Reporting and Visual Analysis

Connect to any JDE module in real time and create inquiries, reports, and dashboards without IT involvement. Summarize masses of data into easy-to-consume visualizations and dashboards, with the ability to drill down to transaction level. Handle JDE reporting challenges with ease, including as-of reporting and custom aging buckets to analyze payables and receivables.

> **Budgeting and Planning**

Shrink your planning cycle by creating budget and forecasts in Hubble and emailing to cost centers, allowing them to enter their numbers in a central location: No more consolidating multiple Excel sheets. Manage the approvals process, then monitor performance and variances in real time.

> **Report Distribution**

Automate the distribution of reports and dashboards by email to internal and external users to share a single version of the truth with a wider audience of decision makers.

> **Production Reporting Acceleration**

Add Hubble's fast reporting database to handle large data volumes with ease while delivering immediate report refreshes and drill-downs. Integrate your JDE data with other sources to enable wider comparisons and more detailed analysis.

GET UP AND RUNNING FASTER WITH OVER 300 PREBUILT TEMPLATES COVERING JDE WORLD AND E1
