

HUBBLE[®] FOR ORACLE E-BUSINESS SUITE

COMPLETE SELF-SERVE REPORTING FOR
ORACLE E-BUSINESS SUITE

Hubble is a complete finance-owned reporting and planning solution for Oracle E-Business Suite (EBS). Save time and money by no longer relying on external IT support for report writing. Close your books faster by ensuring everyone has access to real-time, accurate information to streamline reconciliations, consolidations, and reporting.

PURPOSE-BUILT TO HANDLE ALL YOUR EBS REPORTING NEEDS

If you find native EBS reporting tools slow, limiting, and IT-centric, let Hubble put you back in control. Out of the box, Hubble understands your users, responsibilities, security, FlexFields, and much more. Designed for use by finance and business users to reduce the reliance on IT, Hubble lets you start with pre-built templates or create your own reports and dashboards in minutes and run them in seconds. Drill into supporting information in real time to get the answers you need.

> Reporting and Visual Analysis

Connect to any EBS module in real time and create inquiries, reports, and dashboards without IT involvement. Summarize masses of data into easy-to-consume visualizations and dashboards, with the ability to drill down to transaction level. Handle EBS reporting challenges with ease, including as-of reporting and custom aging buckets to analyze payables and receivables.

> Budgeting and Planning

Shrink your planning cycle by creating budget and forecasts in Hubble and emailing to cost centers, allowing them to enter their numbers in a central location: No more consolidating multiple Excel sheets. Manage the approvals process, then monitor performance and variances in real time.

> Report Distribution

Automate the distribution of reports and dashboards by email to internal and external users in order to share a single version of the truth with a wider audience of decision makers.

> Production Reporting Acceleration

Add Hubble's fast reporting database to handle large data volumes with ease while delivering near-instant report refreshes and drill downs. Integrate your EBS data with other sources to enable wider comparisons and more detailed analysis.

GET UP AND RUNNING FASTER WITH OVER 140 PREBUILT TEMPLATES COVERING EBS 11I & R12

About insightsoftware

insightsoftware turns financial and operational data into a 360-degree view of the financial reporting lifecycle for better business outcomes that drive growth and ROI. Through turnkey reporting and enterprise performance management solutions such as Atlas for Dynamics, Wands, Hubble, Spreadsheet Server, and CXO Software, insightsoftware provides real time access to data-driven insights and overviews. Knowledge is then delivered in an efficient, cost-effective, and secure manner via integration with ERP and EPM systems and Microsoft Excel. Learn more at www.insightsoftware.com.

"Hubble is a cost effective and easy to use reporting tool. We have found it to be far more user friendly and capable than the standard Oracle reports."
