SUPERIOR
FINANCIAL
& OPERATIONAL
REPORTING
FOR ORACLE®
E-BUSINESS
SUITE

You Deserve Independence from Your IT Department

Do you find that the native Oracle E-Business Suite (EBS) reporting tools, such as Financial Statement Generator (FSG), Discoverer, and Oracle Business Intelligence Enterprise Edition (OBIEE), are challenging to use and force you to rely on IT to build and modify your reports and ad hoc inquiries? Do you find...
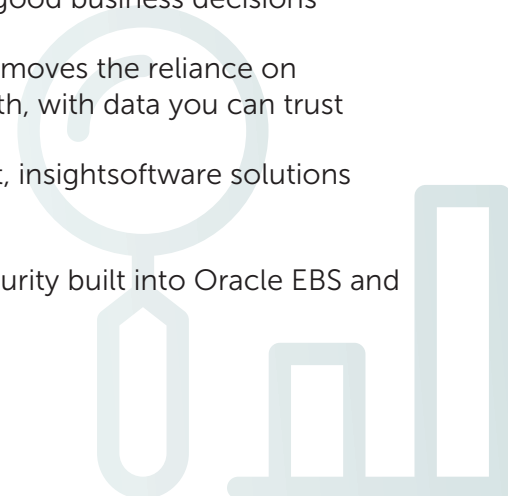

- The "out-of-the-box" reports don't cover finance's reporting needs?

- You waste time dumping data from EBS into Excel for reporting and spend hours formatting?

- A lack of real-time access to data prolongs reconciliations and standard journal entries and adjustments at month-end close?

- Drill downs in Subledger Accounting in EBS R12 are manual and painful?

- Managing exception reports like assets with credit balances or liabilities with debit balances is challenging?

Take Control of Your Financial and Operational Reporting

With software that is deeply integrated with EBS—and that understands your users, responsibilities, security, FlexFields, and much more—we help simplify your processes to shrink your financial and operational reporting cycles, leaving more time for analysis.

- **Pre-Built, Turnkey Content:** A vast library of templates for finance and operations to get you up and running on day one

- **Remove IT Dependency:** Free yourself from slow, inflexible, technical native tools (like OBIEE and FSG) and empower ordinary users to build the reports they need in minutes

- **Gain More Insights from Oracle EBS Data:** Create ad hoc inquiries, custom reports, and dashboards. Drill down into the information you need to make good business decisions

- **Access Real-Time Data:** Deep, real-time integration with EBS removes the reliance on out-of-date snapshotted data, giving you a single version of truth, with data you can trust

- **Easy, Lightweight Installation:** Not another lengthy ERP project, insightsoftware solutions install in hours and deliver value out of the box

- **Keep Your Data Secure:** insightsoftware leverages the same security built into Oracle EBS and uses EBS credentials

Wands

REAL-TIME FINANCIAL REPORTING FOR ORACLE® EBS IN EXCEL

"[Wands] saves us a lot of time extracting real-time information and rather than using this time in the report and extraction, this time is used for analysis and decisions."

John Castillo Tellez
Brink's Incorporated

- GL reporting provides control of numbers at the cell level
- Sub-ledger reporting against Accounts Payable, Fixed Assets, Human Resources, etc.
- Create and distribute reports and inquiries with real-time refresh within Excel, without IT help
- Drill from summary to transaction in real time to find and fix issues
- Define and model budgets and plans in Excel, then instantly review actuals, budgets, and forecasts
- Upload journals back to the EBS from within Excel

Hubble

LIVE DRILLABLE WEB REPORTS FOR ORACLE EBS

"Reporting should have been prioritized when we initially decided on Oracle EBS. Now management accountants can see the status of any part of the business, empowering them to proactively manage and compare the performance of each division—the confidence they have in data now is amazing."

Ed Lynott, Head of IT
FM Conway Limited

- Gain rapid insights through ad hoc inquiries, reports, and web dashboards
- Built-in ERP smarts and pre-built content ensure a fast time to value
- Create inquiries, reports, and web dashboards without IT help
- Drill from summary to transaction in real time to find and fix issues
- Enter and approve budgets on the web to shrink planning cycles
- Speed up processes through alerts, workflows, and discussions including distribution and audit trails
