Group	**Key Products**
Management Platform	WAS, DevOPs, Rational, ITSM, IBM PureApp
Cloud Integration	IIB, API, MQ, Data Power
Digital Business Automation	BPM, ECM, ODM, RPA

IBM Hybrid Cloud

Application Platform

- Application platform tools and services from IBM help dynamically develop, assemble, test, deploy and iterate software.

Product: Websphere Application Servers, IBM PureApp

PaaS

- Platform as a service (PaaS) is a category of cloud computing services that provides a platform allowing customers to develop, run, and manage applications without the complexity of building and maintaining the infrastructure typically associated with developing and launching an app.

Product: IBM Bluemix

amstar

Adding value to lives
An ISO 9001:2015 Certified Company

IBM Hybrid Cloud

Mobile Development & MBaaS

- With IBM MobileFirst Platform Foundation, you can extend your business to mobile devices. IBM MobileFirst Platform Foundation provides an open, comprehensive, and advanced mobile application platform for smartphones and tablets. It helps organizations of all sizes to efficiently develop, test, connect, run, and manage mobile applications (apps).

Product: IBM MobileFirst Platform Management

IBM Hybrid Cloud

IT Service Management

- IBM IT service management solutions help IT operations teams to effectively manage increasingly complex, hybrid environments and accelerate cloud services delivery. These solutions deliver advanced automation, performance management and orchestration capabilities..

Product: IBM Netcool, IBM APM, Tivoli Composite Application Manager

IBM Hybrid Cloud

DevOps

- Continuous delivery of Software driven Innovation

      Product:

- Collaborative development – RAD, Rational Clearcase, RSA
- Continuous Business Planning – IBM Rational Insight
- Continuous Release & Deployment – UrbanCode
- Continuous Testing – RFT, RPT, RQM

IBM Hybrid Cloud

Aspera

- Leading provider of eXtreme File Transfer (XFT) solutions that significantly reduce the barriers of data size and distance for organizations across a range of industries. Aspera is a market leader for its patented fasp™ transfer software that eliminates the fundamental shortcomings of conventional, TCP-based file transfer technologies, such as FTP and HTTP. Licensed either for the cloud or on premise, Aspera technology can achieve speeds that are hundreds of times faster than FTP/HTTP and provide a guaranteed delivery time regardless of file size, transfer distance or network conditions, including transfers over satellite, wireless, and inherently long distance and unreliable international links.

IBM Hybrid Cloud

Enterprise Content Management

- IBM enterprise content management solutions use analytics to provide access to content for the right people at the right time to help make better decisions.

  Products: IBM Case Manager, IBM Datacap, IBM Navigator, IBM Content Foundation

IBM Hybrid Cloud

Process Transformation

IBM Websphere BPM

IBM Business Process Manager is a comprehensive business process management platform. It provides a robust set of tools to author, test, and deploy business processes, as well as full visibility and insight to managing those business processes.

IBM RPA

With robotic process automation (RPA), you can automate your routine tasks quickly and cost effectively. RPA bots can easily integrate with your broader automation initiatives — such as process and decision automation, or data capture initiatives — to expand the value of your automation program.

IBM Hybrid Cloud

Process Transformation

IBM Operational Decision Manager

IBM Operational Decision Manager is an advanced digital process automation (DPA) software suite that captures, automates and governs frequent, repeatable business decisions.

IBM Analytics

Big Data- Hadoop System

- Software platform designed to help firms discover and analyze business insights hidden in large volumes of a diverse range of data—data that's often ignored or discarded because it's too impractical or difficult to process using traditional means. Examples of such data include log records, click streams, social media data, news feeds, electronic sensor output, and even some transactional data.

IBM Analytics

Business Analytics

Business Intelligence

- Cognos - IBM Cognos Business Intelligence provides reports, analysis, dashboards and scoreboards to help support the way people think and work when they are trying to take business decisions

Predictive Analytics

- SPSS - With SPSS predictive analytics software, you can predict with confidence what will happen next so that you can make smarter decisions, solve problems and improve outcomes

Prescriptive Analytics

- iLOG - IBM ILOG is a collection of tools, technologies and services designed to help customers more effectively and efficiently analyze, plan, track and improve business processes

IBM Analytics

Planning Analytics

- IBM Planning Analytics, is an enterprise planning software platform that can transform your entire planning cycle, from target setting and budgeting to reporting, scorecarding, analysis and forecasting

Product: Cognos TM1

Data Refinement, Integration & Governance

- Transform diverse data into trusted, protected information, managed across its lifecycle, for delivery or easy access.

Product: IBM Infosphere

IBM Analytics

Data Warehousing

- IBM data warehousing solutions help to simplify and accelerate the delivery of business analytics insights. From multidimensional analysis and deep analytics to in-memory and columnar technology to industry models, IBM has the right solution for gaining insight from information.

    Products: IBM DB2 with BLU Acceleration, IBM Pure Data System for Analytics, IBM Informix Warehouse

Database

- DB2 and Informix

IBM IOT

Asset and Facilities Management

Enterprise Asset Mgmt

- Maximo - Maximo Asset Management allows organizations to share and enforce best practices, inventory, resources and personnel. It helps manage all types of assets – including plant, production, infrastructure, facilities, transportation and communications.

Facilities Mgmt

- Tririga - Through business analytics, critical alerts and automated process capabilities, IBM TRIRIGA can increase visibility, control and automation of: Real Estate Management, Capital Projects, Space Management, Facility Maintenance & Energy Management.

IBM IOT

Requirements Management

- It helps teams to deliver the right products and improve outcomes by better managing the impact of change.
- **Product: IBM Rational Doors**

Continuous Engineering
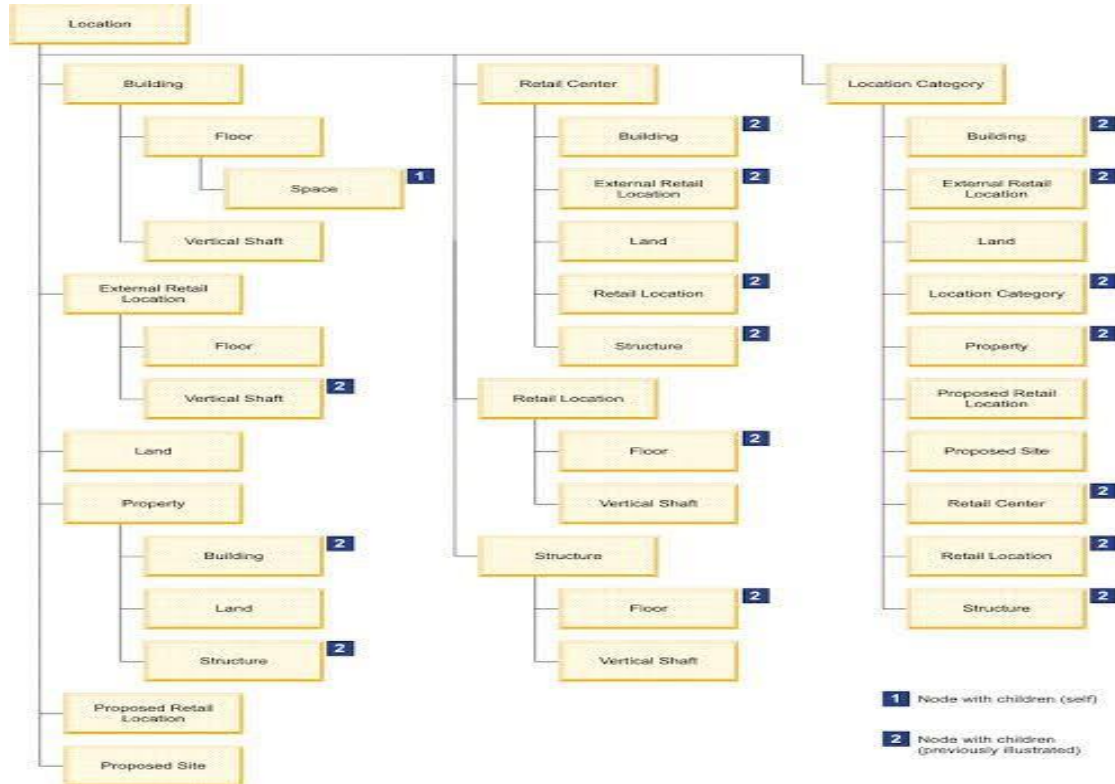

Modeling and simulation

- IBM modeling and simulation solutions can be used from the conceptual design phase, supporting analysis, verification and validation of requirements, architectures and designs using Systems Modeling Language (SysML) and Unified Modeling Language (UML).
- **Products: IBM Rational Rhapsody**
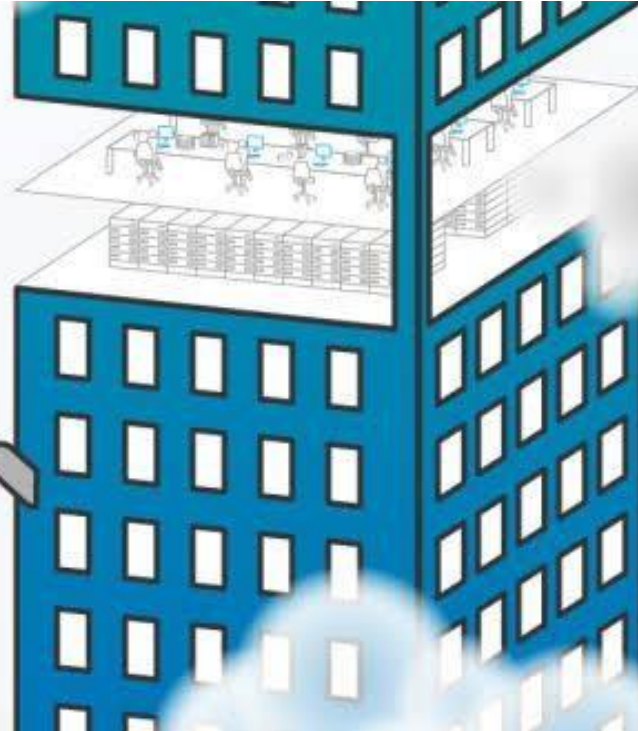

Maximo

Maximo Scheduler: Roles We Cater To

Planner
- Model work steps in Job Plans and Routes
- Define PM frequencies
- Forecast long term work and cost
- Use historical data to adjust the plan

Scheduler
- Create rolling work schedule
- Resource level/Capacity Plan
- Schedule windows
- Dependencies & Critical Path
- Monitor schedule compliance

Technician/ Crew
- Receive assignments, optimized routes and directions
- Report on progress and work completion

Supervisor/ Dispatcher
- Assign work to people or crews
- Monitor and assign emergency work
- Manage crew resources
- Monitor dispatched people and crews

Repair Facility Planner
- Assign mobile assets to a facility
- Manage Repair Facility capacity

Tririga

Tririga

IBM IOT

Cities Management

Infrastructure, Planning and Management Services

- Help cities use operational data holistically to gain insights and improve efficiency within Water Management, Energy Analytics & Traffic Operations

Products: Intelligent Operations Center, Intelligent Video Analytics, Intelligent Water, Intelligent Transportation, Insight Foundation for Energy

IBM Commerce

Customer Analytics

➢ IBM **Customer Experience Analytics** gives you the insights you need to resolve issues, boost conversions and maximize lifetime customer value.

Products: IBM Tealeaf

IBM Commerce

Digital Experience

➢ The IBM **digital customer experience** solution helps organizations create and deliver compelling, targeted online experiences for customers, Business Partners and citizens with integrated content, social, mobile and analytic tools. It engages customers on their own terms, providing robust analytics, personalization, social and marketing capabilities.

➢ **Products: IBM Websphere Portal, IBM Web Content Manager**

eCommerce and Merchandising

➢ Commerce solutions from IBM provide a unified approach to managing evolving digital and physical channels.

Products: IBM Sterling Commerce

IBM Commerce

Marketing Management

- **Understand what makes your customers tick.**
- Engage buyers in highly relevant, interactive dialogues across digital, social, and traditional marketing channels.
- **Products: IBM Campaign (Unica)**

IBM Security

Advanced Fraud Protection

- Deliver a holistic, integrated cybercrime fraud prevention platform
- Help detect and prevent the full range of attack vectors responsible for the majority of online, mobile and cross-channel fraud.
- **Product: IBM Security Trusteer**

Application Security

- IBM application security testing solutions provide preemptive protection for mobile and web-based applications. They secure apps from malicious use today and help you remediate potential attacks in the future.
- **Product: IBM Security Appscan**

IBM Security

Identity & Access Management

- IBM Security identity and access solutions help safeguard valuable data and applications with context-based access control, security policy enforcement and business-driven identity
- **Product: IBM Security Access Manager, IBM Security Identity Manager**

Mobile Security

- IBM Mobile Security solutions enable organizations to secure devices, data, applications and users.
- **Product: IBM MaaS 360**

IBM Security

Network Protection

➢ IBM network security software and solutions provide advanced threat protection and real-time threat intelligence to secure your network infrastructure.

➢ **Product: IBM Security X Force, IBM Security Network Intrusion Prevention System**

Security Intelligence & Analytics

➢ IBM's intelligent approach to security helps you find threats faster, identify vulnerabilities, perform forensic analysis, manage risks, automate compliance, and respond to incidents.

➢ **Product: IBM Qradar**

Cyber Security

➢ **i2** - Visualisation and Analysis of disparate data sources to aid criminal investigation (including anti-terrorism, Police intelligence, military intelligence and defence), as well as commercial fraud.

IBM Social

Enterprise Social and Mail

- **Business Email**
  - ➢ Notes & Domino, iNotes and Verse
- o **Collaborative Applications**
  - ➢ Domino Designer, Utility Server, Sametime family
- **Enterprise Social networks**
  - ➢ IBM Connections
- **Cognitive Collaboration & Conversation tool**
  - ➢ IBM Watson Workspace

Talent Management

➢ Attract, engage and retain talent to build a Smarter Workforce
